

## **HI6800 Series in a Panel Mount Wall System**

**REDUCE YOUR TIME TO DESIGN, ASSEMBLE AND DEPLOY**

Certified for use in both Ordinary and Hazardous Locations (Class I/ DIV 2), the Hardy HI6800 series of weight controllers are now available a pre-assembled stainless-steel enclosure.

The Panel Mount Wall System can be configured with or without summing card installed inside the enclosure; when configured with a summing card, it eliminates the need for a separate junction box.

**We've done the work for you!**

Just hang it on the wall, connect power and load cell(s) and you are ready to calibrate! The PMWS eliminates the following headaches:

- Selecting and ordering an enclosure.
- Drilling and punching holes.
- Selecting and ordering glands.
- Ordering separate components.
- Ordering separate cable assemblies.
